Summary

GenAI Engineer with 3 years of software development experience building production **LLM applications, RAG pipelines, and multi-agent workflows** with **Python, FastAPI, LangChain, LangGraph, and OpenAI APIs**. Built the GenAI layer of a **Learning Management System (LMS)**, including a RAG course assistant and an agentic AI tutor. Comfortable owning features end to end, from **React.js** interfaces and REST APIs to vector search, evaluation, and deployment on **AWS** with Docker and CI/CD.

Skills

LLMs & GenAI:	OpenAI API (GPT-4o, GPT-4), Claude, Gemini, RAG, Agentic Workflows, AI Agents, Function/Tool Calling, Prompt Engineering, Embeddings, Hybrid Search, Reranking, Guardrails
Frameworks & LLMOps:	LangChain, LangGraph, PydanticAI, Hugging Face, Langfuse, LangSmith, RAGAS, LLM Evaluation
Languages & Backend:	Python, FastAPI, Pydantic, JavaScript (ES6+), TypeScript, Node.js, REST APIs, SSE Streaming, JWT
Frontend:	React.js, Next.js, Tailwind CSS
Databases & Vector Stores:	PostgreSQL, pgvector, Redis, Pinecone, Qdrant,
Cloud & DevOps:	AWS (EC2, S3, Lambda, Bedrock), Docker, GitHub Actions, CI/CD, Git

Professional Experience

GenAI Engineer | *Transcom, Pune* *Mar 2026 – Jul 2026*

- Designed and implemented **agentic AI workflows using LangGraph**, orchestrating multiple specialized agents powered by **GPT-4o** with tool calling and shared state to automate complex, multi-step tasks.
- Owned full-stack feature development with **React.js and FastAPI**, using **Pydantic and PydanticAI** for type-safe APIs and structured LLM outputs.
- Containerized **AI services using Docker** and deployed them on **AWS** through CI/CD pipelines.

Software Developer – GenAI | *Si6 Associates, Bangalore* *Jan 2024 – Feb 2026*

- Built the GenAI layer of a **Learning Management System (LMS)**, delivering a **RAG-based course Q&A assistant** that answers learner questions grounded in course material with source citations, using Python, FastAPI, LangChain, **GPT-4**, OpenAI embeddings, and Pinecone.
- Engineered the end-to-end **retrieval pipeline** for course content, covering ingestion, chunking, embedding, semantic retrieval, and reranking for relevant context.
- Developed an **AI tutor agent with LangGraph** that routes learner queries, calls retrieval and LMS tools, and keeps conversation memory to give step-by-step, course-aware explanations.
- Built **REST APIs in FastAPI** and **React.js** chat interfaces to integrate the assistant and tutor into the LMS, with authentication and role-based access for learners and instructors.
- Implemented **input validation, guardrails, and retrieval controls** to keep answers in course scope, cutting out-of-scope and hallucinated answers by ~**20%** on the evaluation test set.
- Reduced average response latency by ~**20%** and token cost per query by ~**15%** using **Langfuse** observability, prompt optimization, and tighter retrieval context.
- Defined **prompt engineering strategies and evaluation test sets** to measure and improve answer quality and reliability across prompt and model changes.

Frontend Developer Intern | *Bigbooster Technology (Remote)* *Jan 2023 – Jul 2023*

- Built reusable **React.js components** and responsive, cross-browser interfaces with **Tailwind CSS** for production web apps.

Projects

FresherAI – Multi-Agent AI Career Growth Platform GitHub

- Built an AI-powered career platform for **resume optimization, mock interviews, and personalized career roadmaps**, backed by a 6-service microservices architecture.
- Engineered multi-agent workflows using **LangChain and LangGraph** for interview question generation and answer scoring.

Education

GIET University, Gunupur – B.Tech in Computer Science and Engineering *2020 – 2024*
